Printer Installation Guide

What's in the box?

Smart Printer (1)

Power Supply (1)

Ethernet Cable (1)

Installation Diagram

Your Existing Internet Service Router

Labrador Smart Printer

Step 1: Locate Your Existing Internet Service Router with Available Ports

Step 2: Connect the network port on the Smart Printer to Your Existing Service Router with the included Ethernet Cable

Step 3: Connect the included Power Supply to the Smart Printer. Plug it into an electrical socket and turn the Smart Printer ON.

Step 4: Once the green 'Power' light turns solid, the printer is Online (this may take up to 2 minutes). A blinking green light means the Printer is not connected or lost connectivity, please check that internet service is available and all wire and power connections are plugged in securely.

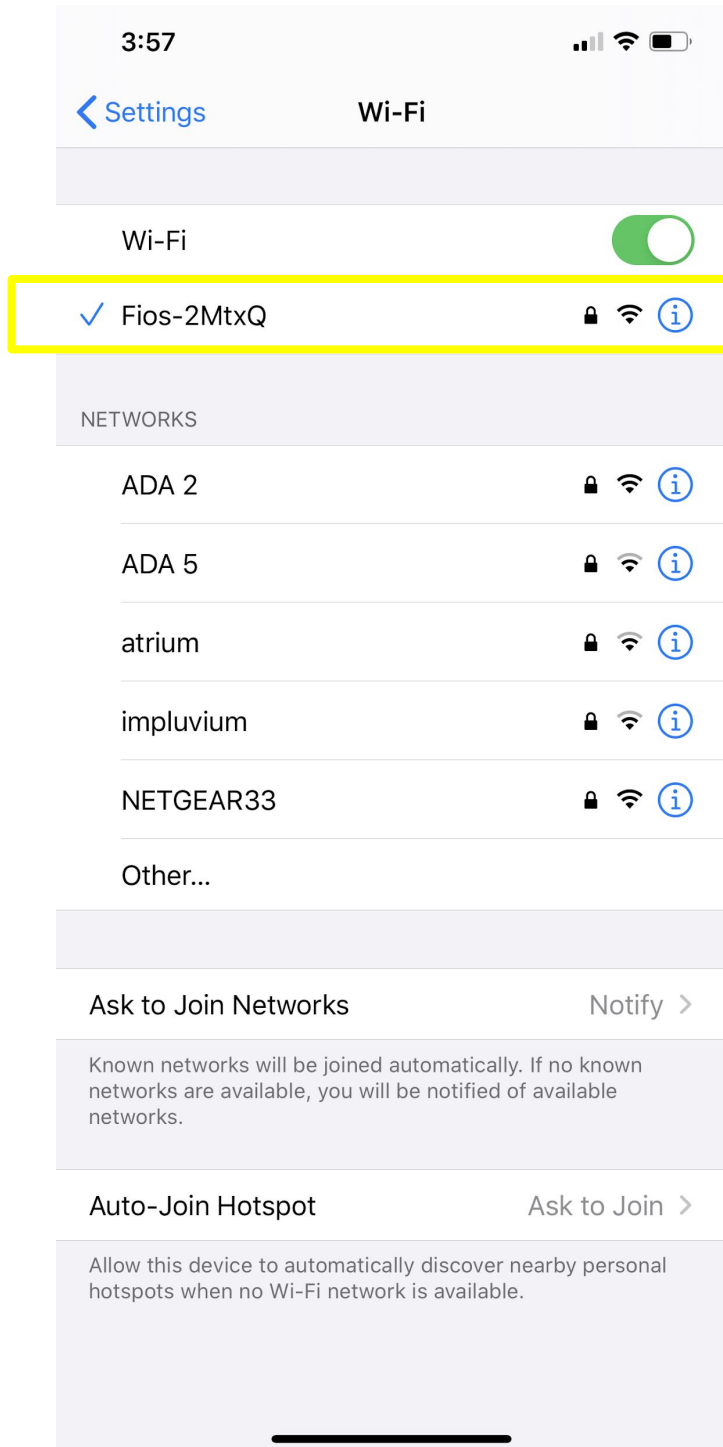

Solid GREEN mean online

Flashing GREEN mean offline

NOTE: To perform a printer Reset, turn the printer OFF using the power switch on the front of the printer. Press and hold the Feed button while turning the printer back ON.

Wifi Set Up: Email Network <u>NAME</u> & <u>PASSWORD</u>
to support@labrador.ai

Please add screen grab image of the Wifi Network name if possible.
